

Washing machine

Our washing machine is a Miele PW 5065. Have a look at the [instruction manual](#) before using it.

Detergent drawer

- The leftmost portion of the detergent drawer is meant for fabric softener. Don't put any detergent in there.
- The **middle** portion is for the main cycle. This is generally where you want to put your detergent.
- The rightmost portion of the detergent drawer ("Vorwäsche") is only used during special programmes or if you activate the respective option.

In case there's some detergent left over after use, please wash the detergent drawer. You can remove it by pressing the tab on its upper left side and pulling the drawer out.
