# tuermeroam on Windows 10

I hate Microsoft with a burning passion for this and only this. Needless to say, setting this up is a bit annoying.

Step 1: Open WLAN status

Go to the WLAN settings while connected/connecting to *tuermeroam* and open the *Network and*

Step 2: Open WLAN security settings

...curity tab.

Step 3: Set the right settings

Set *EAP-TTLS* as the authentication method and open its settings. In the window that pops up, set `anonymous@oih.rwth-aachen.de` as the anonymous identity and `; oih.rwth-aachen.de` as the domain. Yes, with the semicolon and the space. No, I don't know why.

Finally, set *PAP*

After clicking OK, you will have to enter your username and password again. Windows will then ask you if you're connecting to this network where you expect, which you are, so click OK.

Congratulations!

Welcome to the internet !
